I am a retired Electronics Engineer with over 30 years of experience in the design of electronic systems and management of their implementation in both commercial and military fields. My core skills are in the design and realisation of automated systems, usually operating with a small team of dedicated engineers.

Recent responsibilities include the roles of Test Manager / Test Authority in:

delivering the National Traffic Control Centre the Highways Agency in Birmingham,

developing and delivering the Cyclamen radiation detection systems for the Home Office Anti-Terrorism Unit,

assuring the implementation phase of the Barclays Cycle Hire Scheme for the Mayor of London.

I would like to contribute some of my acquired skills and experience towards the operation of the Parish Council.

Interests

I served as a Civilian Instructor with 859 (Dalgety/Marconi) Squadron [from 1988 to 1995] and 1189 (Portsmouth) Squadron [from 1995 to 2009] of the Air Training Corps. Qualified as an Authorised Range Conducting Officer for small-bore and full-bore target rifle shooting.

I am a member of Horndean Camera Club with a special interest in wildlife photography

Contributions/Capabilities

In particular, I would like to bring to bear my in-depth knowledge of Health & Safety legislation and my management skills in the development and delivery of different types of systems and capabilities. My experience base also includes management of change in simple and complex projects and working for the development of young people in life skills and other interests.
