

Proposals for AQUIND Interconnector

Welcome

AQUIND Limited is the developer of AQUIND Interconnector, a new underground and subsea electric power transmission link that will connect the GB and French electric power grids, facilitating the transfer of electricity between the two countries.

If approved, AQUIND Interconnector will increase competition across energy markets, which could mean lower energy prices for consumers and businesses. It will improve security of supply, help foster greater renewable energy integration and supply ancillary services, which will provide greater flexibility in managing the electricity grid.

The main elements of the project will include subsea and underground cables, with new converter stations in both the UK and France. In the UK, the proposed landing point is Eastney, near Portsmouth, and the new converter station will be located near Lovedean, Hampshire. The terrestrial cable route will run through the Portsmouth, East Hampshire, Havant and Winchester administrative areas.

As part of our commitment to community engagement, AQUIND would like to invite you to attend one of our public exhibitions, to view proposals for AQUIND Interconnector, speak with the project team and share your feedback.

Find out more at our one of our public exhibitions

Wednesday 24
January 2018

2 – 8 pm
Waterlooville Community
Centre, 10 Maurepas Way,
Waterlooville, PO7 7AY

Friday 26 January 2018

2 – 8 pm
Milton Village Community
Hall, 182 Milton Road,
Southsea,
PO4 8PR

Saturday 27 January 2018

2 – 8 pm
Lovedean Village Hall,
160 Lovedean Lane,
Waterlooville, PO8 9SF

Members of the team will be available to talk you through the scheme and answer any questions you may have.
